Highlights

1990

DAKU Italia starts operating in Italy, as a branch of DAKU GmbH

1997

DAKU Italia S.r.l. is established

2003

Daku Italia acquires from Daku GmbH the exclusive use of the DAKU trademark in Italy. The two companies start collaborating for R&D

2008

Thanks to its new commercial network, DAKU Italia starts operating with total independence

2019

DAKU Italia files the patent for the “DAKU IRRIGA” technology and starts the R&D for the “DAKU Blue Green Roof” project

2020

DAKU Italia is certified as “PMI innovativa”

2021

Thanks to the 1.350.000 m² of green roofs it has built and the 1.650 projects it has completed in over 30 years, DAKU Italia confirms itself as the market leader in Italy

History

Mission

DAKU Italia **PROMISES** its customers and the environment to bring nature on the roof.

DAKU's priority and focus are to **PROTECT** biodiversity in urban environments, by building rooftop gardens that reduce the human impact.

DAKU Italia offers **THE MOST ADVANCED TECHNOLOGY**, a wide-spread commercial network and the ability to operate everywhere.

DAKU Italia aims at reaching its goals while **REDUCING** costs, by developing new digital technologies and creating a network of companies to simplify logistics.

Our rooftop gardens are designed and certified by architects and engineers. Our gardens are not only decorative elements, but also real architectural and technological solutions for the environment

A provider of advanced green roof systems

DAKU guarantees its customers the best technology and supports construction companies in order to optimize the installation of DAKU systems.

For over 25 years, DAKU has provided systems that are advanced, high-quality and innovative. All systems are highly-tested and **COMPLY** with the UNI 11235-15 standard.

A General Contractor for green roofs

DAKU Italia **SUPPORTS** architects finding the best and most affordable solutions. DAKU's team also assists them designing all the details of the green roof.

DAKU assists companies by offering to install **COMPLETE** roof packages, from the waterproof surface to the insulation coat.

DAKU guarantees **ASSISTANCE** after the installation, to make sure the system is operating correctly.

For over 25 years in Italy, DAKU has represented an ideal partner for construction companies, providing technological solutions that reduce costs and construction time.

Company overview

Customer care

Our customer care service is tailored to the needs of **EACH** customer.

Each time customers need it, they can count on a team of professionals **DEDICATED** to them. These professionals will provide quick and precise answers, **SUITED** to their needs.

DAKU's team will **ALWAYS** be available to support all steps of the project, from the design to the installation.

Furthermore, the most urgent requests will be discussed immediately through **SKYPE** and then a team's member will be on site as soon as possible.

Enjoy an exclusive and glamorous garden in the middle of buildings and concrete. Think of a place where you can relax and spend time with your loved ones or friends. Discover how to realize your desires

Green roofs' energetic performances can always be improved

DAKU believes that technological improvement comes from one simple idea: water is a natural **ENERGY SOURCE**, not using it is a waste

DAKU believes in a new way of designing buildings, based on sustainability. **SAVING** resources and using them with **EFFICIENCY** are key elements for contemporary projects.

DAKU is working to make green roofs more and more efficient

Following this philosophy, DAKU has researched and filed a patent for an innovative system: **BGR** (Blue Green Roof).

DAKU set the following goals: **REDUCING** the effects of heavy rain, with less water going to waste; **REDUCING** the amount of water used to irrigate the roof; **IMPROVING** the energetic efficiency of the roof; **MAXIMIZING** the positive effects of the natural thermal regulation

DAKU is constantly developing new sustainable and resilient systems
