

## . LAYER FOR DRAINAGE AND WATER STORAGE

### Supply and installation of:

**DAKU FSD 10** components, which are rigid sheets made of sintered expanded polystyrene foam. They are produced with materials free from regenerated elements. They are of white color, barely flammable and their raw mass is of 25 kg/m<sup>3</sup>. They are provided with CE marking and comply with UNI EN 13163 standards. All DAKU FSD 10 components comply with UNI 11235:2015 standards. They perform a threefold function of mechanical protection of the waterproof surface, water drainage and water storage.
