

. ADDITIONAL FERTILIZER

Supply and installation of:

DAKU PLUS-I, which is an additional nutrition compost for the DAKU ROOF SOIL substrate. It is made of fertilizing granules, covered with a bio-degradable polymeric membrane which gradually releases nutritive substances, depending on the substrate's temperature during a period of several months. The compost is supplied in bags with a weight of 25 kg.

Technical data:

Total amount of azote	13%
Nitric azote	4%
Ammoniacal azote	9%
Phosphorous pentoxide (soluble in citric acid and water)	22,6%
Phosphorous pentoxide (soluble in water)	20,7%
Potassium oxide	9%

The installation is made by hand, with a density of 5 gr/m² for each cm of substrate.
