Mission

Bringing nature to the roof is a promise that Daku makes with its customers and towards the environment.

A priority and a will to protect biodiversity in urbanized settings, with the installation of green roof solutions that reduce the human impact. Daku's aim is to improve the quality of life of residents while creating a space for the development of the indigenous flora and fauna. Daku will have to represent the excellence of the technical offer, with a capillary and timely commercial presence and a direct and widespread operational capacity in the area.

A certified green roof is not a mere decorative element, but a fully integrated system, at the service of the environment and of architecture and engineering professionals

Manufacturer of advanced green roof systems

Assuring its customers the best technical solutions and working alongside the Works Directors and Applicators to optimize the use of Daku systems.

Guaranteeing the supply of advanced, high quality and high-performance systems, tested for over 25 years throughout the national and international territory and compliant with UNI 11235-15.

General Contractor for the realization of green roof systems

Supporting the designers, in identifying the most technically suitable and economically most convenient solutions and supports them for the development of construction details.

Collaborating with companies for the implementation of complete roofing packages, from waterproofing to insulation, to any roof green package.

Guaranteeing to the end customer a support over the years for the right and proper maintenance of green works.

For over 25 years, the ideal partner for construction companies, with certified technical solutions that allow both a reduction in the time of realization and of projects' costs

Company overview
